

Product Summary	
<b>Manufacturer</b>	CSA (Bermad Water Technologies)
<b>Brand</b>	CSA-FOX 3F-RFP Combination
<b>Product Type</b>	Valves & Hydrants
<b>Product Sub Type</b>	Air valves
<b>Application(s)</b>	Pressure
<b>System(s)</b>	Drinking Water, Non-Drinking Water

## Approval

### Scope of Approval

A range of CSA Fox 3F-RFP DI bodied combination (double orifice) air valves in sizes from DN 25 to 250 manufactured to AS 4956:2008 Air valves for water supply.

The valves, suitable for water applications in pump stations and pipelines, evacuate air during pipeline filling, allow release of air pockets from pressurized pipes and enable large volumes of air intake in the event of network draining. The flanged valves are available in sizes DN 50 to 250 with PN16 or PN35 flanges to AS/NZS 4087 Figure B5 and B6 respectively. DN 25 and 50 valves are also available with a BSP threaded connection rated as PN 16 or PN35.

**Pressure Rating(PN)/Stiffness(SN):** PN16

**Jointing:** Flanged

**Special Condition(s):**

**Size Range:** DN25, 50, 80, 100, 150, 200 and 250  
 DN 25 and 50 in BSP thread in PN16 and PN35  
 DN 80 to 250 in flange in PN16 and PN35
