

Welcome to the latest edition of BWT News. You'll find news and product information from the BWT team.

Announcing interactive training facilities in Sydney and Brisbane.

Expanding our training capabilities to New South Wales and Queensland ensures the Bermad team can continue supporting water professionals through best-practice training and product configuration.

We're proud to announce the expansion of our training facilities to include new demonstration rigs in Brisbane and Sydney.

This development comes in recognition of our long-standing commitment to training and knowledge-sharing throughout the industry. The new rigs will ensure Bermad team members can provide valuable training by demonstrating products in a safe working environment.

By early 2020, customers in Queensland and New South Wales will have the opportunity to participate in local training and product demonstrations. These new facilities will minimise the burden of travel time, while helping customers to maximise product performance in the field.

Training is designed to provide confidence for customers using our products in field applications and ensure all solutions are configured for optimum performance.

In addition to our new demonstration rigs in Brisbane and Sydney, Bermad offers hands-on training via our facilities in Melbourne and Western Australia.

For further information on our training and demonstration capabilities, please see [additional details about our interactive training facilities](#).

Bermad release new Sigma EN series.

The Sigma 700 series has long been a benchmark range of products for the Australian water industry. By upgrading to the new Sigma EN series, we now offer an even higher quality product with a wide range of features and benefits.

Bermad has recently upgraded the 700 series of valves—long a benchmark for the industry in Australia—to the next generation Sigma EN series.

Carefully refined through a research and development process spanning the past few years, the new Sigma EN series consists of high-performance valves that offer:

- Greater cavitation resistance
- Greater flow capacity and lower head loss
- Reduced noise and increased stability in performance

CSA air valves raise the bar in quality again.

Thanks to our partnership with Europe's leading air valve manufacturer CSA, BWT today has the highest level of accreditation for the supply of air valves in Australia.

We're proud to announce the field-proven Fox-RFP air valves are today fully approved for drinking water and certified by SAI Global to AS4956.

As part of this certification, the valve also had to pass stringent water quality testing by the [Australian Water Quality Centre \(AWQC\)](#) in Adelaide.

After full certification, the Fox-RFP valve was also appraised by the Water Services Association of Australia (WSSA) to ensure full compatibility for drinking water compatibility in water companies.

Control, protect, measure: 30 years of Bermad Water Technologies.

News

We are proud to say that Bermad Water Technologies has successfully supplied leading water technology products in Australia for 30 years.

With offices in most state capitals—including recent announcements of expanded training capabilities in Queensland and New South Wales—and a team that has increased twenty-fold, everyone at Bermad is proud to have played a role in our growth over the past 30 years.

In that time, Bermad Water Technologies has grown from a control valve supplier to become Australia's largest supplier of air release valves and metering products, with capability and expertise spanning multiple industries

This year, we continue our growth with further expansion in Brisbane and Sydney. In addition to opening our new training rigs, the team is also moving offices to larger premises in both locations, to improve our service and supply capability across Australia.

New address for Bermad office in NSW.

We have recently moved offices in New South Wales.

The new address for Bermad Water Technologies in New South Wales is:

Unit B4
27-29 Fariola Street,
Silverwater, NSW 2128

We're here to help.

Our team of dedicated staff are always prepared to find a solution. We offer extensive technical information and engineering data on our [product pages](#), which are available within our website.

If you require on field assistance, get in touch with our team via our [live field support tool](#), or [contact our team](#) online.

Get in touch – BWT can be found Australia-wide.

For more information, or to speak to one of our staff, call the number in your state.
